٠,

#### Part II DETAILED ACTION

This office action is in response to applicant's amendment filed on January 30, 2006.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### Specification

1. The amendment filed January 30, 2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the newly amended language "the joint (1) is coupled to the second rib section (2) by two pins (11, 12)" (page 4, lines 11-12) is not consistent to what is described in the specification and drawings as originally filed. According to the specification and drawings as originally filed (December 16, 2003), the joint (1) "having a wide base for pivoting with the second rib and the third rib" .... "by two pins (11) (12) respectively" (see page 2, lines 13-25). The specification does not describe the joint (1) being coupled to the second rib (2) by two pins (11, 12). And, Figure 9 shows the pin (11) being only coupled to the joint (1) and the third rib section (3) but not coupled to the second rib (2). In addition, Figures 7 and 8 show the pin (11) being offset from the second rib (2) which show the pin (11) does not coupled to the second rib (2). Therefore, the newly amended language is not supported by the original disclosure of the invention (which include the specification and the drawings). Applicant is required to cancel the new matter in the reply to this Office Action.

Application/Control Number: 10/735,783 Page 3

Art Unit: 3636

2. The specification stand objected to under 35 U.S.C. 112, first paragraph, as failing to provide an adequate written description of the invention. The specification fails to clearly define the umbrella having ribs being arranged in a serial order. It is unclear where is a first rib section since the umbrella includes second and third rib sections.

## Claim Objections

3. Claim 1 is objected to because of the following informalities: the term "improved" (line 1) is improper which may cause confusing of the scope of invention. Appropriate correction is required.

## Claim Rejections - 35 USC § 112

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed language "the joint being coupled to one rib section by two pins" (line 5) is not consistent to what is described in the specification and drawings as originally filed. See the objection to the specification set forth above. Appropriate correction is required. No new matter can be entered.

## Claim Rejections - 35 USC § 102

5. Claim 1 as better understood, stand rejected under 35 U.S.C. 102(b) as being anticipated by Wang (US Patent No. 6,244,284).

Application/Control Number: 10/735,783

Art Unit: 3636

Wang teaches a multiple-fold umbrella comprising a plurality of ribs, each rib having a multiple pivotally joined rib sections (i.e.,30, 20), a joint being pivotally coupled between two rib sections, the joint having a wide base (63) and pins (P1, P2, P3), the joint being pivotally coupled to one rib section (30) by two pins (P1, P2) (see illustration bellow), one of the two pins (P2) being pivotally coupled to another rib section (20), the two pivotally coupled rib sections being positioned, counted from outside, in side by side relationship within the base of the joint in collision (see Fig. 6).

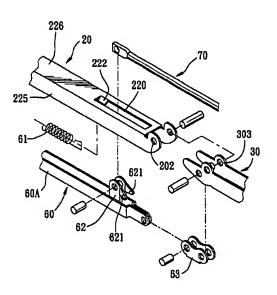

FIG. 3

6. Claim 1, as better understood, stand rejected under 35 U.S.C. 102(b) as being anticipated by Okuda (US Patent No. 5,435,331).

Okuda teaches a multiple-fold umbrella comprising a plurality of ribs, each rib having a multiple pivotally joined rib sections, the rib having a joint pivotally coupled between two rib sections, the joint having a wide base (7), the joint (7) being pivotally coupled to rib sections (6,

8) by two pins (P, W) respectively, wherein one of the two pins (W) is pivotally coupled to one of the rib section (8) and another one of the pins (P) is pivotally coupled to another rib section (6); Alternatively, the joint (7) is coupled to one of the rib sections (8) by two pins (P, W), and one of the two pins (P) is pivotally coupled to another rib section (6); whereby the two pivotally coupled rib sections (8, 6) are positioned, counted from outside, in side by side relationship (8-6) within the base (7) of the joint in collision as claimed (see Fig. 4).

7. Claim 1, as better understood, is rejected under 35 U.S.C. 102(b) as being anticipated by Weber (US Patent No. 3,902,514).

Weber teaches a multiple-fold umbrella comprising a plurality of ribs, each rib having a multiple pivotally joined rib sections (8a, 8b, 8c), the rib having a joint pivotally coupled between two rib sections (8c, 8b), the joint (16) having a wide base (11) being coupled to one rib section (8c) by two pins (11', 17), one of the pin (11') being pivotally coupled to another rib section (8b), whereby the two pivotally coupled rib sections (8b, 8c) are being disposed counted from outside, in side by side relationship within the base (11) of the joint (see Fig. 4).

#### Response to Arguments

8. Applicant's arguments filed January 30, 2006 have been fully considered but they are not deemed to be persuasive.

In response to applicant's argument that the references to Wang '284 and Okuda '331 fail to show suggest two rib sections being disposed in "side-by-side relationship within the base of the joint" as now claimed, it is not deemed persuasive. As discussed set forth above rejections, Wang is considered to show the joint having a base (63) pivotally connected to rib (30), and the

Page 6

Art Unit: 3636

joint includes two pins (P1, P2) coupled to the rib (30) and one of the pin (P2) being also coupled to the other rib (20) such that in an closed position, as shown in Fig. 6, the ribs (30) and (20) are folded in side by side relationship within the base (53) of the joint. And, Okuda also shows the ribs 8 and 6 being coupled by a base (7), and being disposed in side-by-side relationship, counted from outside of the frame, within the base in the folded position (see figure 4). Notice, first, "a joint" does not mean only "a base", but it would include other elements. Second, applicant only claims the ribs being positioned side-by-side within the position of the base in a folded position not in the opened position. Therefore, to discussed whether or not the ribs of Wang's umbrella being pivotally coupled in linear alignment in the open position is irrelevant. In addition, applicant does not define what is arrangement of "side-by-side relationship". Therefore, Wang and Okuda are considered to show the ribs (i.e., Wang's ribs 30 and 20) are located substantially parallel relationship from outside one adjacent to the other within the joint position as broadly read on the arrangement of a "side-by-side relationship" in the closed position as claimed.

Therefore the rejections are deemed proper and stand granted.

#### **ACTION IS FINAL**

9. Applicant's amendment necessitated the new grounds of rejection. Accordingly, THIS ACTION IS MADE FINAL. See M.P.E.P. '706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. '1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R.

Art Unit: 3636

' 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE

LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

**Inquiry Contacts** 

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Winnie Yip whose telephone number is 571-272-6870. The

examiner can normally be reached on M-F (9:30-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Peter Cuomo can be reached on 571-272-6856. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
